

ASIA TRAINING CENTRE

Subject: Testimonial - Ng Zhi Yang

To Whom It May Concern,

Zhi Yang has successfully completed a near year long internship, from March 2025 to Jan 2026, with the Airbus Asia Training Centre Maintenance Department.

Along the way I have witnessed him grow from a shy, under confident teenager to become a young man, aware of his abilities and able to seamlessly get on with individuals much older than he.

He was tasked with improving an in-house application which notified simulator users of anomalies they may encounter when using the simulator for which there are known workarounds or quick fixes. This application was further expanded to display useful information for both users and maintenance staff, digitalising historical paper based processes.

I can thoroughly recommend that Zhi Yang be suitable for employment in any role commensurate with his competencies, skillsets and stated disciplines.

Yours Faithfully,

Ian GOUGH
